Community benefit

If consented, Lees Hill Renewable Energy Park could provide over £7m in community benefit throughout the lifespan of the project.

We want to work with the local community to ensure that a community benefit fund is designed to support local and regional initiatives, address identified challenges and be responsive to local needs.

Our existing funds have helped to support a variety of local projects, including helping to sustain Duns Swimming Pool, a local charity, allowing it to reinvest in the facilities and provide a valuable service.

If you have any questions or ideas about the community benefit at Lees Hill Renewable Energy Park please get in touch.

Supply chain

We always seek to employ local services during the construction and operation of our wind farms – helping to maximise local economic opportunities.

If you, or your company, would like to register your services please contact suppliers@fredolsen.com.

Visit www.leeshillenergypark.co.uk for further information.

LEES HILL RENEWABLE ENERGY PARK

Hello,

We would like to continue our conversation with the local community about our plans to develop Lees Hill Renewable Energy Park.

We hope that you will be able to attend our forthcoming events. If not, we would encourage you to:

- View the materials online
- Request printed materials
- Get in touch to set up a discussion
- Submit your comments and questions

Public Exhibitions

We will be holding our second round of consultation events on:

Monday 4 September
10am - 2pm
Volunteer Hall, Langtongate, Duns, TD11 3AF

3pm - 7pm
Westruther Village Hall, 6 Edgar Road, Westruther, TD3 6ND

Tuesday 5 September
10am - 7pm
Gavinton Village Hall, South Street, Gavinton, TD11 3QR

Wednesday 6 September
10am - 2pm
Fairbairn Hall, West High Street, Greenlaw, TD10 6XA

3pm - 7pm
Longformacus Village Hall, Duns Road, Longformacus, TD11 3PB

Fred. Olsen Renewables

About the proposal

The proposed Lees Hill Renewable Energy Park is located approximately 5km west of Duns.

Having undertaken a range of consultation and in response to feedback that we have received, our proposals have evolved.

Our plans for Lees Hill Renewable Energy Park now consist of

6 turbines up to 36MW and up to 200m to tip
- A reduction of 1 turbine

Solar panels up to 60MW
- Reduced solar search area for the ground mounted photovoltaic (PV) panels

Battery storage up to 60MW
- The battery storage will be located near the center of the site

Next Steps

Following the public exhibitions we will consider all of the feedback we have received, prior to submitting an application later in the year.

About us

Fred. Olsen Renewables is one of the longest standing renewable energy developers in Scotland.

Our portfolio consists of 258 operational turbines, alongside a further 76 consented. This, combined with our projects in Norway and Sweden, brings our total operational capacity to 787.7 MW – providing enough power for 586,190 homes.

We are excited about the future. With a pipeline of more than 1GW, central to our success will be collaboration with communities, committing to local businesses and contributing towards Scotland's sustainable future.
